

Homework

Mr Grafton

Spring term 1 2022/23

CRAVE CURRICULUM NEW TOPIC - The Appalachian Trail to the Everglades

TOPIC HOMEWORK

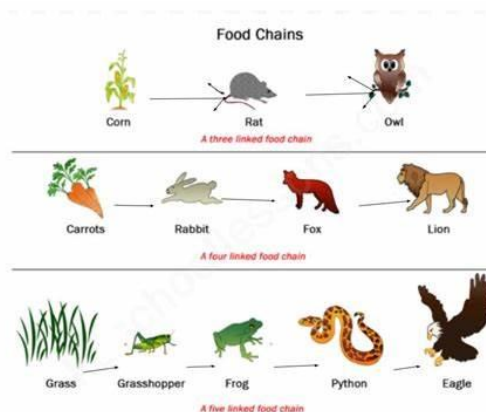

Please choose a homework task for this term's topic.

Create a 3D salt dough map of North America

Salt dough maps are a great way to show the topography of a continent. Use the link below to see how to make salt dough and a step by step guide to making a map. They look fantastic when painted. Use a relief map of North America so you know how to build up the salt dough. The Rocky Mountains will need to be the highest points on your map.

Food Chains

Research some of the animals that can be found in the various habitats along the Appalachian Trail and in the Everglades.

Create posters showing food chains for some of the animals that can be found there. Use the link below to learn about food chains before you start.

US States

Choose US states that interest you and carry out some research into each of them (you can choose as many as you like). For each US state that you study, create a fact file. The fact file should give details on populations, land area, capital cities, bordering states, physical geography, human geography, history and fun facts. You could even create a booklet of fact files.
