

Tapestry 'How it works'

Dear Parents and Carers,

'Tapestry' is an online portal we use across in Early Years to share your child's learning journey. If you have multiple children at school you will only require one login for all children. The feedback we receive for 'Tapestry' has always been a positive one.

How it works

We use Tapestry to record your child's learning and development. Tapestry will build their student profile using the photographs, comments and assessments made against the curriculum. Your contributions will also go into the profile, building up a wider picture of your child.

Staff at school will upload photographs, videos and/or comments to your child's page and you will receive a notification to check your child's profile, via email. You can also feedback to staff with a 'like' or a comment. We encourage all parents and carers to upload their own photographs and videos.

Security

This is a safe way to share information and pictures with you, but we ask that no pictures are then shared on other websites. We reserve the right to suspend accounts that abuse this request. By signing the permission slip below, you are agreeing to...

- not share the photographs on social media
- not swear or use abusive language in the comments section
- not share your password
- inform staff if you have lost your password or device, you are leaving the school or you think you have been 'hacked'

Tapestry is GDPR compliant.

What next?

Please return the consent form even if you already have access 'Tapestry'. We need your permission to agree to your child having an account and to provide the details to set it up. You can have more than one parent account. We are looking forward to using this online journal with you.

If you have previously used Tapestry, we can reactive your old account. Fill in the slip below and return it to a member of staff, we can then send you an activation link via email. Please return your consent as soon as possible.

Many thanks,

BVPS Team
